Programming Tools
GPS_R Project Layout

Peter Matheny & Colton Baker

February 16, 2017

Modules

General Utility

1. Function to line up the times in the video with the GPR recordings.

2. Printing program to print out combined depth information on top of video frame.

GPR Related

1. Function that finds depth in GPR file and assigns it as GPR_depth.

2. Function that locates the GPS coordinates in the GPR file and assigns them as lat and lon.

3. Function that finds the time in the GPR csv file.

4. Correlate GPR printed time to real time from video file.

Video Related

1. Extract GPS coordinates from video.

2. Capture frame from video.

3. Read video into program.

4. Search algorithm to match video GPS to corresponding GPR GPS.

Distribution of Work

Colton - GPR related modules & item 2 of general utilities.

Peter - Video related modules & item 1 of general utilities.
